

## Instructions

Please answer the following questions for CME credit. 100% correct is required for credit. You may take the test more than once, if needed.

## Post-test questions

Falls are the leading cause of injury-related morbidity and mortality among older adults in the United States.

- True
- False

Under DSM-5, anyone meeting any 2 of the 11 criteria during the same 12-month period would receive a diagnosis of AUD (Alcohol Use Disorder.) The severity of AUD—mild, moderate, or severe—is based on the number of criteria met.
